Design Rulebook

Swiggy Support Agent Decision Interface · iteration 7.1 · Figma section “Final · v7” (page “Final · v7”)

Spacing, padding and sizing rules measured from the rebuilt frames · v7.1 · 3 November 2026

0 · How to read this rulebook

This rulebook lists the spacing, padding and sizing rules of the Swiggy Support Agent Decision Interface, iteration 7.1. Each category names one reference frame in the Figma section “Final · v7” (page “Final · v7”) and gives every distance in pixels. The same rule is applied to every other frame in the section: one rule per category, no exceptions. Change a number here and the same change is due everywhere the rule is used.

Every text in the file is cap-height trimmed (Figma: Vertical trim = Cap height) through the Atlas text styles, and every single-line text hugs its content horizontally. A text box therefore spans exactly from the top of its capital letters to its baseline, and all vertical distances below are measured to the cap top or to the baseline of a text, never to a line-height box. Horizontal distances are measured to the first or last glyph box.

Gaps are quoted the way Figma shows them when you hold Alt between two selected layers: the empty space between the two boxes. A 1-px rule (divider) is its own layer, so “16 above / 16 below” means 16 px of empty space between the rule and the text box on each side.

Centring rule: a single-line text or icon inside a band of fixed height is placed at top + ceil((band height − cap height) / 2). When the leftover is odd, the extra pixel goes above the text. Band heights were chosen so that the common 9 px cap centres on whole pixels (31, 29, 27, 39, 37, 51, 21). Every text and rectangle in the section sits on whole pixels (verified after the rebuild: 0 fractional positions in 2,009 texts).

Conventions: x/y are measured from the top-left corner of the named frame. “Band” means a fixed-height strip of content; a rule under a band is not part of its height. “Baseline” is the bottom of a trimmed text box.

0.1 · Cap heights of trimmed text (Inter)

With cap-height trim, Figma rounds the text box height to these values. A text’s box = cap top → baseline; every “cap top” below is the box top, every “baseline” the box bottom.

Font size	Trimmed box height (cap)
10	7
10.5	8
11	8
12	9
13	9
14	10
16	12
18	13
24	17

1 · Type scale (Atlas text styles)

All 27 Atlas styles are Inter with Vertical trim = Cap height. Line heights only matter for wrapping text (bubbles 19, transcript and pop-up rows 20, templates 16).

Style	Used for	Cap
Atlas/10 Regular · 14	Sidebar queue time (inactive)	7
Atlas/10 Semi Bold · 14	Sidebar queue time (active), chats count badge	7

Style	Used for	Cap
Atlas/10 Medium · 14	Shelf badge, ⌘ / K key caps in the search field	7
Atlas/10.5 Regular · 14	Bubble time stamps	8
Atlas/10.5 Semi Bold · 14 (letter-spacing 0.63)	Table captions (TIME, STEP, DURATION…), record-summary tile labels, QUERY TEMPLATES	8
Atlas/11 Regular · 14	Captions: system line, photo caption, tile sub-labels, list sub-lines	8
Atlas/11 Medium · 14	AI-summary meta (8 min, 1), timeline deltas (+3), key-cap labels in the shortcuts pop-up and key-cap element	8
Atlas/11 Semi Bold · 14	Avatar initials (SM, TH, NR), REC, ? and – status glyphs	8
Atlas/12 Regular · 16	Secondary labels: Subject, Signed in since, party stats, table rows in pop-ups, cost line, case-log times	9
Atlas/12 Medium · 15	Chip, option and button labels, Charges and tip, pop-up sub-headings	9
Atlas/12 Semi Bold · 16	Queue initials, RS in the top bar, Total rows, closing-message strip, chat timer, emphasised values inside 12 px runs	9
Atlas/13 Regular · 20	Body: order rows, table rows, select values, transcript lines, pop-up rows	9
Atlas/13 Regular · 19	Chat bubble text (19 px line pitch when wrapping)	9
Atlas/13 Medium · 16	Tabs, agent name, list times, Close ticket / Change decision, Reason chips (Report)	9
Atlas/13 Semi Bold · 20	Section and accordion titles, card names, pop-up row labels, Decision recorded, Fault	9
Atlas/14 Regular · 20	Paid amount	10
Atlas/14 Medium · 20	Paid label	10
Atlas/14 Semi Bold · 20	Column headers (Wrong item, Insights + decision), party name in the name bar	10
Atlas/16 Semi Bold · 22	Pop-up titles, status-menu titles, call timer	12
Atlas/18 Semi Bold · 24	My Workspace	13
Atlas/24 Semi Bold · 30 (letter-spacing −0.24)	Record-summary values, workspace tile values	17

2 · Colour tokens

Token	Value	Used for
surface/canvas	#F8F8F8	Screen background, chat column, party bubble on a white view
surface/surface	#FFFFFF	Columns, cards, pop-ups, bubbles from the party in the customer chat
surface/sunken	#F6F6F6	Search field, photo placeholder, avatar squares, sidebar hover pill, disabled select, call-button hover
surface/head	#FAFAFA	Closing-message strip
line/default	#E8E8E8	Column and panel edges (top bar, sidebar, column headers, reply panel, decision area, dock rule, subject rule)
line/strong	#DEDEDE	Controls and tables: tabs, buttons, selects, inputs, key caps, table header rules, section and accordion rules, total rules
line/faint	#F0F0F0	Row rules inside pop-ups and menus
ink/primary	#161616	Primary text, selected tab/option labels, active queue item
ink/secondary	#646464	Secondary text: party stats, cost-line suffix, Signed in since, close icon, photo caption
ink/tertiary	#A0A0A0	Labels, placeholders, inactive tabs/options, captions, table captions, time stamps, Cancel label while the pair is inactive
action/primary	#1A1A1A	Filled buttons, selected action/chip fills, send button, toasts, count badges, upheld finding dot, done dashes in the closing strip
action/on-primary	#FFFFFF	Text and icons on action/primary
state/info · mark/focus	#1E4FD0	Unread dot, current closing-message dash, rider avatar initials
state/info-soft	#EAF1FD	Rider avatar tint
state/success	#046C45	Met status glyph, deltas, Decision recorded
state/success-soft	#E7F7EE	Met status dot
state/warning	#9A4F05	Choose a reason hint, restaurant avatar initials, ? status glyph
state/warning-soft	#FDF3D0	Restaurant avatar tint, unknown status dot
state/danger	#B42318	REC, Sign Out, not-met glyph, Sign out menu item
state/danger-soft	#FEF2F2	Not-met dot, end-call hover
state/violet / violet-soft	#6B32DB / #F1ECFD	Agent and customer avatar initials and tint
mark/live	#009E68	Presence dot
mark/rec	#E5383B	Priority dash, recording dot
mark/hold	#E8A317	Hold dot in the queue
overlay/scrim	#141414 at 40 %	Scrim under pop-ups
brand/swiggy-orange	#FC8019	Logo on the My Workspace screens
— (no token)	#E7EAF7	Agent bubble fill
— (no token)	#3B4CAD	Agent speaker label in transcripts (darker shade of the bubble colour)
— (no token)	#D9D9D9 at 25 %	Row hover (home list, search results)
— (no token)	#757575	Note-field placeholder

3 · Radii, effects and icons

Radius	Used for
radius/xs 4	Checkbox, key caps, pager current dash
radius/sm 6	Selects, search-result icon box, note field
radius/md 8	Buttons, tabs, chips and options, tiles, logo, photo thumbnail, toasts, avatar squares, call buttons, closing strip
radius/lg 12	Photo viewer image, sidebar hover pill, query-templates menu, settings menu
radius/xl 16	Pop-ups, search-results menu
radius/pill 999	Avatars, count badges, status dots, finding dots, presence/unread/hold dots, pager dot, Reason chips in Report
2 (no token)	Closing-message progress dashes
10 (no token)	Bubble corners (2 px on the speaker-side top corner)
50 (no token)	Reply bar and send button

Effect style	Used for
shadow/xs	Bubbles, status dots, toasts, query-templates menu
shadow/modal	Pop-ups, search-results menu, settings menu
ring/surface · 2	2 px white ring: presence dot, unread and hold dots, chats count badge, n/a status dot

Icons are instances of the Solar Linear components (page “Icons · Solar Linear (proposal)”, solar/<name>-linear; CC BY 4.0) scaled from 24 px, every glyph normalised so round icons read 20, square icons 18 and elongated icons 20 of the 24 box, stroke 1.5; the home and chats icons are the two exceptions kept from the earlier set. Sizes in use: 18 (home icon in the top bar, chats icon, photo-viewer arrows), 17 (search-result receipt), 16 (select chevrons, mic and volume, check-circle, shelf), 15 (section-header icons, top-bar icons and chevron, header actions, query / phone / send in the reply bar, timer icon, menu icons), 14 (chevron-down in rows and cards, pause, flag, phone-end, star, status glyphs inside 22 px dots), 13 (search icon, AI-summary meta icons, eye), 12 (pop-up close), 11 (checkbox check), 10 (recording dot).

4 · Component rules by category

Each category names its reference frame(s). Distances are in pixels; “cap top” and “baseline” refer to trimmed text boxes.

1 · Screen grid and columns

Reference frame: 01 · Mid-chat

Element / distance	Rule
Screen	1440 × 900
Top bar	50 tall (y 0 → 50) + 2 px rule line/default at y 50 → 52
Sidebar	54 wide + 2 px rule line/default at x 54 → 56
Case column (left)	x 56 → 426 (370 wide) + 2 px rule line/default at x 426 → 428
Chat column (middle)	x 428 → 998 (570 wide) + 2 px rule line/default at x 998 → 1000
Insights column (right)	x 1000 → 1440 (440 wide)
Panel rules (2 px)	the four panel rules (below the top bar; after the sidebar, the case column and the chat column) are 2 px; each takes its second pixel from the panel on its left/top, so no column edge or content box moves. Consequence: the chat column’s content box (x 444 → 983) is 16 from its left edge and 15 from its right rule; the case column’s is 16 / 16
Column header	44 tall (y 52 → 96) + rule line/default at y 96; title 14 SB, cap top 17 below the header top (y 69), 16 in from the column edge
First section	content starts at y 97, directly under the header rule
Case column content box	x 72 → 410 (16 in from the column edge, 16 from the 2 px column rule)
Chat column content box	x 444 → 983 (16 in on both sides)
Insights content box	x 1016 → 1424 (16 in on both sides)
Decision area (empty state)	rule line/default at y 807; content y 808 → 900 (92 tall)
Insights scroll region	y 97 → the decision rule (clipped frame)

2 · Top bar

Reference frame: 01 · Mid-chat

Element / distance	Rule
Home icon	icon/home (new Foundations component, Lucide house) 18 px at x 16, y 16 (16 above, 16 below in the 50 band); the orange 27 × 27 radius-8 logo at x 14, y 12 (12 / 11) appears only on the My Workspace screens
Agent avatar	27 × 27 circle at x 72, y 12 (12 / 11 in the 50 band); initials 12 SB centred (cap top y 21)
Presence dot	9 × 9 mark/live at x 91, y 31 with a 2 px white ring
Agent name	13 M at x 107 (8 after the avatar), cap top y 21 (21 above, 20 below)
Name chevron	15 px at x 157 (8 after the name), y 18
Search field	280 × 31, radius 8, surface/sunken, at x 1071, y 10 (10 above, 9 below)
Search icon	13 px at x 1081 (10 inset), y 19
Placeholder	13 R ink/tertiary at x 1103 (9 after the icon), cap top y 21
Key caps ⌘ and K	21 tall, min width 20, padding 6, radius 4, line/strong, label 10 M ink/tertiary centred (7 / 7 / 7); K right edge 6 in from the field (x 1325 → 1345), ⌘ 4 to its left (x 1299 → 1321); both at y 15 (5 above, 5 below inside the field)
Handbook and settings icons	15 px at x 1368 and x 1401 (gap 18), y 18; right edge 24 from the screen edge

3 · Sidebar (queue rail)

Reference frame: Sidebar · default (also Sidebar · hover, Sidebar · hold states)

Element / distance	Rule
Chats icon	18 px at x 16, 16 below the top-bar rule (y 68 on screen)
Chats count badge	17 × 17 circle, action/primary, 2 px white ring, at x 29, y 59; number 10 SB centred
Queue item pitch	65; first initials cap top 72 below the top-bar rule (screen y 124)
Initials	12 SB centred on x 28; active = ink/primary, others ink/tertiary
Time under initials	cap top 17 below the initials cap top (8 below the initials baseline); active 10 SB ink/primary, others 10 R ink/tertiary
Active mark	28 × 2 ink/primary at x 14, 30 below the initials cap top (6 below the time baseline)
Priority dash	12 × 2 mark/rec at x 22, same y as the active mark
Unread dot	8 × 8 mark/focus, 2 px white ring, at x 33, 5 above the initials cap top
Hold dot	same geometry as the unread dot, mark/hold; a held chat that also has a new message shows the blue dot
Hover pill	48 × 48, radius 12, surface/sunken, at x 4, 8 above the initials cap top
Shelf button	rule line/default at y 850 (54 wide); button 54 × 49 (y 851 → 900)
Shelf icon and badge	16 px icon at x 13, 17 below the shelf rule; badge 17 × 17 at x 25, 11 below the rule; number 10 M centred

4 · Section row (left column, insights column, party views)

Reference frame: 01 · Mid-chat — row “Timeline” (rule at y 398)

Element / distance	Rule
Band	41 tall between two rules; the rule above belongs to the previous section, the rule below (line/strong) closes this one
Title	13 SB, cap top 16 below the rule above, baseline 16 above the rule below (16 / 9 / 16 = 41)
Icon	15 px, 16 in from the column edge, 13 below the rule above (3 above the cap top)
Title x	23 after the icon’s left edge (x 95 left column, x 1039 insights); x 444 in party views (no icon)
Count after a title	13 M ink/tertiary, 6 after the title, same baseline (e.g. “(6)”)
Trailing chevron	14 px, right edge 10 in from the content box (x 386 → 400; x 1400 → 1414; x 969 → 983), 14 below the rule above
Status dots	22 × 22, 10 below the rule above; stacked right to left with a 12 px pitch; the right-most dot ends 10 before the chevron (x 1368 → 1390 in Policy conditions)
Title → first content	26 from the title baseline to the cap top of the first text below (Order → ID, AI Summary → Customer said, Party records → Customer, Record summary → CUSTOMER, Activity log → STEP, Acceptance → STEP, Timeline by party → TIME: all 26)
Last content → rule	16 from the last baseline to the section’s closing rule (Paid → rule, last table row → rule); the last section of a column (Party records, Timeline by party) has no closing rule

5 · Order block (case column)

Reference frame: 01 · Mid-chat

Element / distance	Rule
First data row	ID cap top 26 below the Order baseline (y 148)
Row pitch	22 (cap top to cap top)
Label	13 R ink/tertiary at x 72; value 13 R ink/primary right-aligned to x 410 (ID in 13 SB)
Masked-value icon (eye)	13 px, 8 after the label, 2 above the cap top
Item list	starts 40 below the last order row cap top (y 276); pitch 22; complained item 13 SB ink/primary, other items 13 R ink/tertiary; prices right-aligned to x 410
Charges and tip	12 M ink/tertiary, cap top 37 below the last item cap top (y 335); chevron 14 px at x 386, 3 above the cap top
Paid	14 M at x 72 and 14 R amount right-aligned to x 410, cap top 37 below Charges (y 372)
Section rule	16 below the Paid baseline (y 398)

6 · Party record cards (case column)

Reference frame: 01 · Mid-chat and Party records · restaurant open

Element / distance	Rule
First card name	13 SB at x 72, cap top 26 below the Party records baseline (y 534)
Card pitch	60
Chevron	14 px at x 386, 3 above the name cap top
Stats line	12 R ink/secondary, cap top 17 below the name cap top; the first stat's number in 12 SB ink/primary; 16 between stats
Closing rule	none: Party records is the last section of the column, so nothing is drawn under the last card (the 16 rule applies only between sections)
Open restaurant table (Party records · restaurant open)	table header 24 tall starts 16 below the stats baseline; captions 10.5 SB at x 26 / 145 / 262 (10 in, then 38.1 % and 72.65 % of the 339 width), cap top 8 below the header top; header rule line/strong; rows 12 R, first cap top 12 below the rule, pitch 22; Total rule 13 below the last baseline; Total row 12 SB, cap top 12 below the Total rule, 12 above its bottom; View more chip 27 tall 16 below; 16 to the frame bottom

7 · Tabs and the chat header

Reference frame: 01 · Mid-chat (tabs), 05 · Restaurant chat · transcription (Chat / Transcription toggle), 00 · Home (Assigned…)

Element / distance	Rule
Tab	31 tall, 10 padding left and right, radius 8; label 13 M cap top 11 below the tab top (11 / 9 / 11); active = line/strong stroke + ink/primary label, inactive = no box + ink/tertiary label
Tab gap	2 between tab boxes (22 between labels)
Chat header tabs	start at x 440 (12 in from the column), 7 below the header top (y 59); the label baseline (y 79) equals the column-title baseline
Chat timer	65 × 29, radius 8, line/strong, at x 857, 8 below the header top; icon 15 px at 10 inset, 7 below; time 12 SB 4 after the icon, cap top 10 below the pill top (on the tab-label baseline)
Pause and flag	14 px at x 934 and x 969 (gap 21), 15 below the header top; flag right edge on x 983
Chat / Transcription toggle	same tab rule inside the party chat dock (the dock rule above it is 2 px): tabs 7 below the dock rule, chevron 14 px right-aligned to x 983, 15 below; toggle rule line/strong (x 444 → 983) 44 below the dock rule

Element / distance	Rule
Home tabs	same tab rule at x 216, 39 below the tiles; settings icon 15 px right-aligned to x 1224, centred on the tab; list rule 7 below the tabs

8 · Name bar and AI summary (chat column)

Reference frame: 01 · Mid-chat (customer), 04 · Restaurant call · live (rating)

Element / distance	Rule
Name bar	52 tall at y 97 → 149 + rule line/strong at y 149
Avatar	28 × 28 circle at x 444, 12 below the bar top; initials 11 SB centred (cap top 10 below the avatar top)
Name	14 SB at x 482 (10 after the avatar), cap top 21 below the bar top (21 / 10 / 21)
Rating	12 SB right-aligned to x 983, cap top 22 below the bar top; star 14 px 4 before it, 19 below
AI summary band	98 tall at y 150 → 248 + 2 px rule line/strong at y 248 → 250 (the chat body starts at y 250); follows the section-row rule: sparkle 15 px at x 444, 13 below the bar rule; title 13 SB at x 467, cap top 16 below (y 166)
Meta	11 M ink/tertiary right-aligned to x 983, cap top 1 below the title cap top; icon 13 px 4 before each value, 2 above the title cap top; 20 between the two pairs
Rows	label 13 R ink/tertiary at x 444, value 13 R at x 566; first cap top 26 below the title baseline (y 201); pitch 22; rule 16 below the last baseline

9 · Chat bubbles

Reference frame: 01 · Mid-chat (customer chat), 06 · Rider · sections collapsed (bubbles on a white view)

Element / distance	Rule
System line	11 R ink/tertiary centred on the column, cap top 20 below the chat body top (y 270)
First bubble	18 below the system-line baseline (y 296)
Bubble width	maximum 388 (text 368 wide); a one-line bubble hugs: 10 + text + 10 + time + 10
Agent bubble	#E7EAF7, right-aligned to x 983, corners 10 / 2 (top-right) / 10 / 10, shadow/xs
Party bubble	surface (canvas #F8F8F8 when the view behind is white), left at x 444, corners 2 (top-left) / 10 / 10 / 10, shadow/xs
Text	13 R, 19 line pitch, 10 in from the bubble sides, cap top 10 below the bubble top; a one-line bubble is 31 tall (10 / 9 / 12 with the time 4 lower)
Time stamp	10.5 R ink/tertiary right-aligned 10 in from the bubble; one-line bubble: cap top 14 below the bubble top; multi-line: cap top 4 below the last text line's cap top; bubble bottom 12 below the time baseline
Bubble gap	4 between bubbles from the same speaker, 8 when the speaker changes
Photo bubble	208 × 144 with a 200 × 120 radius-8 placeholder 4 in; caption 11 R ink/tertiary centred; time 10.5 R right-aligned 10 in, cap top 128 below the bubble top
Closing screen (11)	the chat body is a clipped frame from the AI-summary rule to the closing reply panel's rule (y 788) and is scrolled so the last bubble ends 12 above that rule

10 · Reply panel, reply bar and closing-message strip

Reference frame: 01 · Mid-chat and Reply panel · closing message 1 of 6

Element / distance	Rule
Reply panel	rule line/default at y 834; panel 65 tall (y 835 → 900)
Reply bar	539 × 39, radius 50, line/strong, at x 444, 13 below the panel top, 13 above the screen bottom
Icons in the bar	15 px query at 12 inset, 15 px phone at 47 inset (gap 20), both 12 below the bar top; placeholder 13 R ink/tertiary at 80 inset, cap top 15 below the bar top (15 / 9 / 15); rider view: phone only at 13 inset, text at 45
Send button	31 × 31 circle, action/primary, 4 in from the right, 4 below the bar top; icon 15 px centred (8 / 8)
Closing-message panel	rule at y 788; panel 111 tall: strip 539 × 37 (radius 8, surface/head, line/strong) 13 below the rule, reply bar 8 below the strip, 13 above the screen bottom
Strip text and dashes	12 SB at 13 inset, cap top 14 below the strip top (14 / 9 / 14); six 14 × 5 radius-2 dashes with a 3 px gap, right edge 13 in, 16 below the strip top; done = action/primary, current = mark/focus, next = line/strong

11 · Insights column

Reference frame: 01 · Mid-chat

Element / distance	Rule
Header	44 tall; title 14 SB at x 1016, cap top 17 below; history icon 15 px right-aligned to x 1424, 15 below
Subject band	51 tall (y 97 → 148) + rule line/strong; label 12 R ink/tertiary at x 1016, cap top 21 below; select 350 × 31 radius 6 at x 1074, 10 below the band top (10 / 31 / 10); select text 13 R at 8 inset, cap top 11 below the select top; select chevron 16 px at 6 inset, 8 below
Record summary	section row (title cap 16 below the rule) then three tiles 106 wide at x 1016 / 1167 / 1318 (gap 45); closing rule at y 317
Tile	caption 10.5 SB ink/tertiary cap top 26 below the title baseline; value 24 SB cap top 18 below the caption baseline; sub-label 11 R ink/tertiary cap top 12 below the value baseline; tile rule 106 wide, 15 below the sub-label baseline; bottom line (11 R label + 13 SB value 6 after it) baseline 22 below the tile rule; section rule 16 below that baseline
Policy conditions	section row only: 41 band with three status dots and the chevron (rules at y 317 and y 359)
Timeline by party	section row; table header 408 × 24 at x 1016, caption cap top 26 below the title baseline (8 below the header top); header rule line/strong; columns x 1024 / 1110 / 1223 / 1336 (8 in, then 94, 207, 320); rows 12 R, first cap top 12 below the header rule, pitch 22; no closing rule (last section of the column)
Clipping	the insights frame ends at the decision rule; a row that would be cut is not drawn (08 ends at 19:58, 09 at 19:51)

12 · Decision area

Reference frame: 01 · Mid-chat (empty), 09 · Decision · partial + coupon, 08 · Decision · reason missing, 10 · Decision recorded

Element / distance	Rule
Fault label	13 SB at x 1016, cap top 20 below the area's rule (ink/tertiary until a fault is picked)

Element / distance	Rule
Fault options	27 tall, 12 padding, radius 8, gap 0, right-aligned to x 1424, 9 above the Fault cap top (label and Fault share the baseline); label 12 M cap top 9 below the option top (9 / 9 / 9); selected = line/strong stroke + ink/primary label
Action buttons	94 × 31, radius 8, line/strong, at x 1016 with a 104 pitch (gap 10); top 27 below the Fault cap top (18 below the Fault baseline); label 12 M cap top 11 below the button top; selected = action/primary fill + white label
Empty area	rule at y 807; buttons end 14 above the screen bottom
Partial + coupon (rule at y 644)	checkbox 15 × 15 radius 4 action/primary with an 11 px white check, 23 below the buttons; its label 13 R 8 after it, cap top 3 below the box top; amount input 80 × 29 radius 8 right-aligned to x 1424, centred on the label (10 / 9 / 10); ₹ 13 R right-aligned 4 before the input, amount 13 R at 6 inset; reason select 408 × 31 radius 6 at x 1016, 8 below the input; cost line 12 R ink/secondary (amount 12 SB ink/primary) at x 1024, cap top 14 below the select; Confirm / Cancel 124 × 31 at x 1016 / 1150 (gap 10), 22 below the cost baseline, ending 17 above the screen bottom
Reason missing (rule at y 687)	same stack without the coupon row: select 10 below the buttons; Confirm at 50 % opacity; Cancel label ink/tertiary while the pair is inactive; hint 12 R state/warning right-aligned to x 1424 on the button-label baseline
Recorded (rule at y 687)	check-circle 16 px + “Decision recorded” 13 SB state/success centred on x 1220 (icon 8 before the text), text cap top 56 below the rule; sub-line 12 R ink/tertiary (amount 12 SB) centred, cap top 16 below the title baseline; Close ticket 124 × 31 action/primary + “Change decision” 13 M ink/tertiary 20 after it, centred as a pair, 41 below the sub-line baseline

13 · Party views: accordions and tables (restaurant and rider)

Reference frame: 04 · Restaurant call · live, 06 · Rider · sections collapsed, 07 · Rider · sections open

Element / distance	Rule
Accordion header	section-row rule: 41 band, title 13 SB at x 444 cap top 16 below the rule above and 16 above the rule below; count 13 M ink/tertiary 6 after the title; chevron 14 px right-aligned to x 983, 14 below the rule above; closing rule line/strong x 428 → 999
Rules row dots	five 22 px status dots, pitch 12, right-most ending 10 before the chevron, 10 below the rule above
Table header	539 × 24 at x 444; captions 10.5 SB ink/tertiary cap top 26 below the accordion title baseline (8 below the header top); header rule line/strong; columns x 444 / 632 / 790 (rider activity log: 444 / 761 / 895)
Table rows	13 R; first cap top 12 below the header rule; pitch 22; delta 11 M state/success 6 after the time, 1 lower; note column 12 R ink/tertiary; closing rule 16 below the last baseline
Open party view (04)	accordion stack from y 97; 2 px dock rule line/default at y 677 → 679; dock band 41 (Transcription title cap 16 below the rule, chevron 14 below); subject rule at y 720
Subject of Error band	rule line/default, then 56 tall: select 539 × 31 radius 6 at x 444, 13 below the rule (13 / 31 / 12 to the next rule); text 13 R at 9 inset, cap top 11 below; chevron 16 px at 8 inset, 8 below; disabled = surface/sunken at 50 %; placeholder = ink/tertiary; selected = ink/primary
Transcript (05)	2 px dock rule at y 540 → 542; toggle band 44 + rule; speaker 12 SB at x 454 (Agent #3B4CAD, a darker shade of the agent-bubble #E7EAF7; Restaurant ink/primary), line 13 R at x 543 (440 wide); first cap top 13 below the toggle rule; next entry cap top 17 below the previous entry’s last baseline; subject rule at y 777
Rider bubbles (06)	2 px dock rule at y 540 → 542; toggle band 44 + rule; first bubble 8 below the toggle rule; subject rule at y 777; reply bar with the phone icon only

14 · Call bar

Reference frame: Call bar (also Call bar · hover states)

Element / distance	Rule
Bar	rule line/strong then 57 tall (570 wide)
Timer	16 SB at 16 inset, cap top 23 below the bar top (23 / 12 / 22)
Recording dot and REC	10 px dot mark/rec at 50 % opacity at 68 inset, 24 below; REC 11 SB state/danger at 82 inset, cap top 25 below
Buttons	four 30 × 30 radius 8 boxes with a 4 px gap (pitch 34), right-aligned 16 in from the bar (x 422 → 554 in the element), 14 below the bar top; mic-off filled action/primary with a white icon; icons 16 / 14 / 16 / 14 centred
Hover	pause and volume boxes surface/sunken; end-call box state/danger-soft with a state/danger icon
In screen 04	reply rule at y 776; reply bar 13 below; call-bar rule 13 below the reply bar (y 842); call bar fills to the screen bottom

15 · Home · My Workspace

Reference frame: 00 · Home · Assigned (also 00b · Home · Shelved)

Element / distance	Rule
Page	white; content block x 216 → 1224 (1008 wide, centred on the 1440 screen with 216 margins); no sidebar; the top bar keeps the orange logo here (every other screen shows the home icon in its place)
Title	18 SB at x 216, cap top 84 below the top-bar rule (y 136); bar-chart icon 15 px right-aligned to x 1224, 1 above the title cap top
Tiles	two 498 × 51 radius 8 line/strong tiles at x 216 and x 726 (gap 12), top 24 below the title baseline (y 173)
Tile value	24 SB at 16 inset, cap top 17 below the tile top (17 / 17 / 17)
Tile label and caption	label 13 SB 20 after the value, cap top 13 below the tile top; caption 11 R ink/tertiary on the same x, cap top 8 below the label baseline
Tabs	31-tall tabs at x 216, 39 below the tiles (y 263); settings 15 px right-aligned to x 1224, centred on the tab; list rule 1008 wide 7 below the tabs (y 301)
Rows	pitch 47; avatar square 32 × 32 radius 8 surface/sunken at x 226, first 10 below the list rule; initials 12 SB centred; title 13 SB at x 268 (10 after the square), cap top 4 below the square top; sub-line 11 R ink/tertiary cap top 16 below the title cap top; timer 13 M ink/tertiary right-aligned to x 1161, centred on the square; three 4 px menu dots, pitch 7, ending at x 1224, centred on the square
Marks	unread dot 8 px with a 2 px ring at x 248, 2 below the square top; priority dash 12 × 2 at x 236, 2 above the square bottom
Hover	1020 × 44 radius 10 #D9D9D9 at 25 %, x 220, 6 above the square
Shelved tab	held-since sub-line; party 13 M ink/tertiary at x 992; duration right-aligned to x 1161; no marks

16 · Pop-up frame (shared rules)

Reference frame: Keyboard shortcuts (reference), applied to every 720-wide pop-up

Element / distance	Rule
Width	720 for every pop-up; height follows the content and never exceeds 560 (Party records, Case log and Policy handbook are fixed at 560)
Shape	radius 16, surface, shadow/modal; on screen centred horizontally (x 360) and vertically over a 40 % overlay/scrim

Element / distance	Rule
Padding	20 left and right (title at x 20, close icon ends at x 700, rows and fields x 20 → 700); 24 from the top to the title cap top; 20 from the last button or row to the bottom
Title	16 SB at x 20, cap top 24
Close	12 px × icon ink/secondary, right edge 20 in, top on the title cap top (y 24)
Title → first text	32 from the title baseline to the first text cap top (Report, Put on hold, Keyboard shortcuts, Sign-out, Report sent, Case log, Policy handbook, status menus, view more: all 32)
Title → first box	24 from the title baseline to the first box top (Photo viewer image)
Row list	rows 37 tall; text cap top 14 below the row top (14 / 9 / 14); row rule line/faint from x 20 to 700 under every row except the last; label column x 31, value column x 181
Buttons	Confirm / Cancel pair 124 × 31 radius 8 with a 10 gap, centred (x 231 and x 365), 16 below the last field or row; label 12 M; primary = action/primary fill + white label; secondary = line/strong stroke + ink/primary label; inactive pair = primary at 50 % opacity and Cancel label ink/tertiary; destructive primary = state/danger

17 · Report, Put on hold, Sign-out, Report sent, Photo viewer

Reference frame: Report · nothing selected, Put on hold, Sign-out confirm, Report sent to restaurant, Photo viewer

Element / distance	Rule
Report sub-heading	12 M ink/tertiary at x 20, cap top 68 (32 below the title baseline)
Reason chips (multi-select)	31 tall, 13 padding, radius 999, gap 6, from x 20, 11 below the sub-heading baseline; 13 M; selected = action/primary fill + white label
Note label and field	label 12 M ink/tertiary cap top 14 below the chips; field 680 × 66 radius 6 line/strong 11 below the label baseline; placeholder 13 R #757575 at 12 inset, cap top 12 below the field top; buttons 16 below the field; 286 tall pop-up
Put on hold	question 13 SB cap top 32 below the title baseline; party chips 27 tall, 12 padding, radius 8, gap 8, 11 below the question baseline; 12 M; selected = action/primary fill + white label; 20 below the chips to the pop-up bottom (135 tall)
Sign-out	two 37 rows: “Signed in since” 12 R ink/secondary at x 30; time 13 R ink/tertiary 15 before the duration 13 SB right-aligned to x 690; summary row: 10.5 SB captions 10 before their 13 SB values, 24 between pairs, right-aligned to x 690; Sign Out (state/danger) / Cancel 16 below the last row (196 tall)
Report sent	seven 37 rows, label 13 SB at x 31, value 13 R at x 181; 20 below the last row (339 tall)
Photo viewer	image 584 × 300 radius 12 at x 68, 24 below the title baseline; arrows 18 px at x 29 / 673 centred on the image (previous at 50 % when there is none); caption 13 R ink/secondary and 12 R ink/tertiary centred; pager 6 below the image (20 × 8 radius 4 current, 8 px dot next, gap 4), centred; table header 680 × 24 at x 20, 14 below the pager; captions at x 31 / 159 / 256 / 435; row 13 R 12 below the header rule; Agree (secondary) / Disagree pair 22 below the row baseline; 20 to the bottom (499 tall)

18 · Party records pop-ups (the owner’s reference example)

Reference frame: Party records · view more (Restaurant); Party records · Customer / Rider / Restaurant

Element / distance	Rule
Top spacing to “Restaurant”	24 (title cap top)

Element / distance	Rule
Left spacing to “R”	20
Title to sub-title	sub-title 13 R ink/tertiary 16 after the title, shared baseline
“Restaurant” → “Duration”	32 (title baseline to caption cap top; the 24-tall table header starts 24 below the baseline and the caption sits 8 below the header top)
“Duration” → line	8 (caption baseline to the header rule, line/strong, x 20 → 700)
Line → “+5”	12 (header rule to the first row cap top)
Row pitch	22; columns x 30 / 279 / 514 (10 in, then 38.1 % and 72.65 % of the 680 width); rows 12 R
Finding dot	15 px at x 514, 3 above the row cap top; upheld = action/primary fill; not upheld = line/strong ring
Total	Total rule line/strong 13 below the last row baseline; Total row 12 SB, cap top 12 below the rule, 12 above the row bottom; 20 to the pop-up bottom (217 tall)
Tabbed pop-ups (Customer / Rider / Restaurant)	fixed 720 × 560; tabs at x 20, y 20 (31 tall); close × at y 24; table header 24 below the tab-label baseline; Total rule pinned at y 506 so the Total row ends 20 above the bottom; 3 / 1 / 2 rows (customer and rider rows are placeholders)

19 · Case log, Policy handbook, status menus, menus, toasts

Reference frame: Case log, Policy handbook, Policy conditions · change status, Rider rules · change status, Search results · hover, Query templates · condition unknown, Toast · ticket closed, Settings menu

Element / distance	Rule
Case log	560 tall; first entry cap top 32 below the title baseline (y 68); pitch 32; time 12 R ink/tertiary at x 30; node 9 × 9 ring ink/tertiary 2 px at x 78 on the entry cap top; spine 1 px line/strong at x 82 from the first to the last node centre; text 13 R at x 103, 580 wide; scrolled variant: 4 px track line/faint and thumb line/strong 8 in from the right
Policy handbook	row list: code 13 SB at x 31, text 13 R at x 108 (581 wide); row height = text height + 28 (37 for one line); rules line/faint x 20 → 700; clipped at 560
Status menus (Policy conditions, Rider rules)	440 wide inline section: title 16 SB at x 16, cap top 24; rows 37 tall from 32 below the title baseline, rules line/faint x 16 → 424; status dot 22 px at x 16 centred on the row; name 13 SB at x 50, description 13 R ink/tertiary 8 after it, truncated to one line; under the open row a 41 band with the option chips (27 tall, 12 padding, gap 8, from x 50, 8 below the row content; no rule between the row and its chips, the band closes with a line/faint rule; current state = line/strong stroke + ink/primary label); customer side: Met / Not met; rider side: Met / Not met / N/A
Search results menu	280 wide, radius 16, line/strong, shadow/modal; rows pitch 44 from y 17: icon box 31 × 31 radius 6 at x 17 with a 17 px receipt; title 13 SB at x 58, cap top 4 below the box top; sub-line 11 R ink/tertiary cap top 15 below the title cap top; hover 258 × 43 radius 10 #D9D9D9 at 25 %, x 11, 6 above the box
Query templates menu	539 wide, radius 12, line/strong, shadow/xs; caption 10.5 SB ink/tertiary at x 17, cap top 17; template 13 M (505 wide) cap top 20 below the caption baseline; 17 from the last line to the bottom (87 tall; all-met variant 70 tall)
Toasts	31 tall, radius 8, action/primary, shadow/xs; text 13 M white at 14 inset, cap top 11 below (11 / 9 / 11); width = text + 28
Settings menu	220 wide, radius 12, line/strong, shadow/modal; two 43 rows split by a line/faint rule; icon 15 px at x 16 centred; label 13 M at x 41 centred; Sign out in state/danger
Key caps (shortcuts pop-up and element)	21 tall, min width 20, padding 6, radius 4, line/strong; label 11 M ink/primary centred; 6 between caps; “+” and “/” 12 M ink/tertiary on the row text baseline; description 13 R at x 181

5 · Decisions (your answers applied) and remaining deviations

Your answers to the v7 decision table are applied; the irregularities you reported are resolved by the one-rule-per-category convention. Each item is reversible; none was silent.

Topic	What v7 does and why
2 px rules (4 Nov)	Top-bar rule, the three vertical panel rules, the AI-summary rule and the dock rule above Chat / Transcription are 2 px. Each takes its second pixel from the panel on its left/top so that no column edge moves; the only visible side effect is the chat column's right margin (15 to the rule instead of 16). Every other rule stays 1 px. Verified after the rebuild: 0 of 2,008 texts off the pixel grid.
Top-left tile (7 Nov)	The orange placeholder tile is replaced by the owner-supplied black-and-white Swiggy mark (photos/brand-mark.png, 108 px source shown at 27 × 27, clipped to radius 8; the white mark is scaled 4 px smaller around its centre, 16.6 px tall in the 27 px tile). It shows only on My Workspace; inside a case that spot stays the Home icon. The mark is used as supplied, not redrawn.
Settings and its pop-ups (7 Nov)	Top-bar settings icon = gear (Solar settings, round 20), grey box while open; Sort keeps the sliders icon. Settings menu = the Sort dropdown pattern: card radius 16, 11 padding, 44 rows inset 6, 31 icon box, sb13 label, grey hover, no dividers, no selection; width 200; right edge on the gear (1424), 6 below it. Items: Manage profile, Appearance, Chat settings, Keyboard shortcuts, Help, Sign out (red). Each opens a 720-wide pop-up (title 20/24, content from 54, .lrow rows 37 incl. rule, side margin 20, text inset 10, section captions = caps ink3 in a 33 band, 8 between sections, pop-up ends 20 below its last row, no grey footnotes). Chat settings: Reply language dropdown (current first, then A→Z); General: Spelling, Grammar, Style, Autocorrect; Ignore options: all-caps words, domain names, mixed case, words with numbers. Toggle component: 32 × 18, on = act (black) with knob right, off = line/strong grey, hover darkens. Manage profile: avatar block, Display name, Status (Online / Away chips, same as the name toggle), Signed in, Agent ID (Hypothetical). Appearance: Theme, Text size, Density chips + Reduce motion toggle (preview only). Help: full-width hover rows with chevron; Policy handbook and Keyboard shortcuts open, Report a problem and Contact team lead = next-phase toast.
Top bar and workspace (7 Nov)	No chevron after the agent name (the name area only toggles Online / Away); its hover box ends 6 after the name, matching the avatar side. My Workspace wait timers start on varied seconds (35:02, 14:37, 12:51, 6:18, 4:44) so they don't tick in step.
Section titles (7 Nov)	Titles say what the section holds, in sentence case, no symbols; policy codes stay. Renamed (approved in the Title Rename Review doc): Order → Order details; Timeline → Order timeline; Evidence → Customer evidence; Party records → Interaction history; Query templates → Question templates; Activity log → Trip log; Contact attempts → Attempts to reach customer; Rider-reported incidents → Incidents reported; Rider rules R1–R5 → Rider checks; Acceptance and preparation → Preparation timeline; Order as sent to the kitchen → Kitchen order ticket (KOT); Customer instructions → Special instructions; Stock / substitution changes → Item substitutions; Insights + decision → Insights and decision; Subject → Issue type (field moves to x 1090 to keep the 15 px label gap); Record summary → History summary; Policy conditions → Policy checks; Timeline by party → Events by party; Fault → At fault; On-hold → On hold; Case log → Audit trail (button, shortcut and log lines too); Report sent to restaurant → Restaurant report; Customer photo → Evidence photo. Kept: AI Summary, Customer said, Bot offered, Chat / Transcription, Subject of Error, the record counts, the action buttons, Shelved, Avg. Case Handling Time.
Rider checks order (7 Nov)	Rider checks list in number order (R1, R2, R3 …), the same as Policy checks; the stacked status icons in the header follow the same order.

Topic	What v7 does and why
Prototype review, round 5 (5 Nov)	Side panel: a closed case leaves the queue (returns on Reopen). Case log: time, node and text share one cap line. Policy conditions / rules: no divider under the section title (dividers only between rows). Not applicable = "!" (typed, same weight as "?"). Decision actions hover like the search bar: sunken fill + ink/tertiary stroke. "Choose a fault" shows at once; "Choose a reason" only after the inactive Confirm is clicked. Partial refund: no item rows (the affected items are understood) and no coupon checkbox (the coupon applies only when an amount is entered); layout per Figma 296:4500. End call: line icon at rest, pressed = red square with a white filled icon. Dock spacing standard (all rider / restaurant Chat and Transcription windows): 16 from the tab rule to the first item, 12 between system lines, 16 system line to content, 20 content to system line, messages 4 / 8. Ticket closed: green icon; line 2 = "₹X refunded · Fault by Y"; actions; report line last, grey r12, no underline. Closed ticket: reply bar inactive and empty, placeholder "Ticket closed · Reopen the case to chat"; unsent drafts are cleared.
Decision message before Confirm (5 Nov)	Picking an action (with a fault; Send Review needs none) loads a draft in the Customer chat telling the customer what the agent is doing and why (fault + amount). The customer replies with a scripted filler (per ticket and action, Hypothetical). On pushback, the next draft says the decision is final: accept it, or the case can go to someone else for review; the customer then answers. The decision never changes and Confirm is never blocked by this step (the agent follows it by role). Changing fault, action or coupon before sending regenerates the draft. Then Confirm → Close ticket → closing messages → Ticket closed.
Status icons (5 Nov)	Applies to every status icon (Policy conditions, Rider rules, Restaurant rules, Evidence; single and stacked). Ring: 0.875 px, the same for single and stacked icons; the 2 px white outline around stacked icons is removed, so stacked icons overlap directly. Inner marks: tick, cross and dash are drawn lines at 1.25 px, the stroke weight of the "?" (Inter SemiBold 11). The dash is 8 px long, the same span as the tick and cross. The "?" stays a typed glyph (it is the reference weight).
Closing sequence (5 Nov)	After the decision is confirmed and the closing drafts load, the agent never sends more than two closing messages in a row: after each pair the customer is shown typing and replies (about 1.5 s), then the next draft loads. Customer replies are scripted per case (Hypothetical): refund, "Okay." → "Okay, thanks." → "No, that's all. Thanks."; review, "Okay." → "How long will that take?" → a closing ack; deny, the customer pushes back once after the reason. Agent wording is unchanged; the closing-message count still counts agent messages only.
Chat / Transcription panel visibility (5 Nov)	The panel exists for a party (rider or restaurant) only after a finished call or a message with that party; before that there is no panel band and no Subject of Error, and the party view runs down to the reply panel. During a live call the panel still stays hidden; when the call is cut the panel appears collapsed with Transcription selected, and the arrow (or anywhere on the band) expands it. When the agent messages the party (or starts the scripted chat), the panel appears expanded with Chat selected. Each party keeps its own panel state (open / collapsed, Chat / Transcription). If the panel already exists, ending a call switches it to Transcription without collapsing it, and a new message switches it to Chat. Subject of Error appears together with the panel.
Tab hover (5 Nov)	Every tab row (Customer / Rider / Restaurant, Chat / Transcription, My Workspace tabs, records pop-up tabs) hovers text-only: an unselected tab turns from ink/tertiary to ink, with no fill. The selected tab keeps its white fill and line/strong stroke. The Chat / Transcription band stays fully clickable (it opens and closes the dock) but shows no grey band on hover. Replaces the round-4 grey tab hover.

Topic	What v7 does and why
Dropdown rules (5 Nov, apply to every dropdown redesigned from now)	Source: the finalised Sort dropdown, built on your Search dropdown. 1 Card: surface fill, 1 px line/strong stroke + modal shadow, radius 16, 11 padding top and bottom, no dividers between rows. 2 Rows: 44 tall, inset 6 from each side, radius 10; hover = grey (hover token). 3 Selection: the current value keeps the same grey fill permanently; picking another option moves the fill; no tick. 4 Content: 13 Semi Bold ink, no grey sub-lines; with an icon, a 31 × 31 radius-6 box at 11 in the row (17 px icon) and the text 10 after it, centred on the box (cap top 17); text-only rows start at 11 in the row, cap top 17. 5 Width: an icon-triggered menu hugs its content (6 + 11 + [31 + 10] + longest label + 11 + 6 → Sort = 188) and right-aligns to the trigger's hover box; a field-triggered menu takes the field's width and left edge. 6 Position: 6 below the trigger, or 6 above when it would pass the bottom (Subject of Error opens upward). 7 Order: a flat list without group captions shows the current value first, then the rest A → Z. 8 Length: up to 8 rows visible (8 × 44 + 22 = 374) , then the list scrolls with the thin on-hover scrollbar. Applied: Sort (every Sort in the app; today only My Workspace has one), Subject (Insights + decision; group captions dropped, current value first then A → Z), Subject of Error (restaurant and rider) — text-only, black.
Prototype review, round 4 (4 Nov)	Workspace right column (analytics, sort, ⋯, times, Held-by) moved 10 left so it ends 10 inside the list rule; row hover unchanged. Agent pill hover radius 8. Sidebar chats icon is static (only the orange logo returns to My Workspace). Evidence dots align their right edge with the chevron column above (right − 10). Records pop-ups list every complaint in the 90-day total (real rows first; the rest Hypothetical filler) in a scrolling list with the Total row fixed; inline tables show five. Report is a toggle (click again removes it, no confirmation) and is per party — the header flag reflects whichever chat is open. Tabs: unselected hover is sunken grey, selected stays white with its stroke; collapsed dock band is 44 like the open one. Long texts (incidents, KOT) wrap at 13/20 instead of truncating. Record summary icon = Solar clipboard-list (swapped in all 11 case screens; the home analytics icon keeps chart-2). Status dots carry a 1.5 stroke in their own colour and a 2 px white separator when stacked. Policy status menu offers Met / Not met only and stays open after a change until the row is clicked again. Policy and rider-rule rows read "R1 Delivered at address" + a 2–3 word grey cap (From bot · Agreed on 2 of 2 · Full refunds · ~40 m from drop · +10 min at rider steps); the long form lives in the tooltip. Star ratings are coloured green ≥ 4.0, amber 3.0–3.9, red < 3.0 (Hypothetical bands). Dropdown rows hover with 6 px side insets and radius 10 like the search results. Toasts sit top-centre, 60 below the top bar, and use short phrases.
Prototype review, round 3 (4 Nov)	Workspace rows keep the radius-10 hover; the dashboard keeps sharp full-width hovers. ⋯ is a 30 × 30 box inside the row: the row stays grey while the dots turn black only when the cursor is on the box (dots 3 px). Empty-state captions sit a quarter of the way down the list area. Circular 30 px hovers: pop-up close, photo-viewer arrows, reply-bar query and call icons. View more is a secondary 31-tall button. Inline party records show up to five rows; the pop-up shows all. Chat timer hugs its text (10 inside each side, icon → text 4), right edge fixed at 922. Held = amber 30 × 30 radius-8 square with a white filled pause; Reported = red square with a white filled flag, shown only while that party's chat is open. Customer call = centred "Transcription" pill (127 × 31, radius 18) that expands to a 469-wide card (title 20/21, rule at 46, rows: speaker 12 SB at 20, text 13 R / 20 at 109, pitch text + 17, 20 below) — Figma section "Customer Call Transcription- Redesign". Rider / restaurant call or chat = centred grey 11 R line with the "You joined" spacing, in the dock chat and in Transcription (Transcription exists for both parties; the rider call carries no scripted transcript). Dock stays collapsed and Subject of Error is absent until a call or chat has happened; the whole 44-tall dock header is the toggle. Name bar is fixed above the scrolling party view. Call bar: red 8 px recording dot, Speaker toggle (volume glyph, black when on), icons 16 / 16 / 16 / 17; on hang-up the bar stays 0.5 s then slides down while the stack below settles (320 ms). Query templates float 8 above the reply bar. Photo bubble: time at right, Agreed (green) / Disagreed (red) at left, blank when unreviewed. Priority + active in the sidebar = one red 28 × 2 line. Toasts: neutral grey fill / confirmation green / caution amber / alert red, no stroke, text in the darker tone; shown bottom-centre of the case column. Fault label always ink; Fault and action are clickable at any time in the prototype. Native selects replaced by custom dropdowns (field 31, menu radius 12 with the settings-menu shadow, rows 37, group captions 10.5 caps, check on the current value; opens upward near the bottom).

Topic	What v7 does and why
Interaction rules from the prototype review (4 Nov)	Every clickable icon gets the same hover box: 30 × 30, radius 8, surface/sunken (top bar, chat header, insights header, pop-up close, photo-viewer arrows, reply-bar icons, call bar, workspace icons). Row hovers are sharp-cornered rectangles spanning the whole horizontal panel (workspace rows, sidebar queue, section headers, timeline-by-party rows, record-table rows); the ⋯ row menu turns black only when the cursor is on it. Active states use filled icons: pause-bold in mark/hold for a held chat (the word “Held” is gone), end-call-bold in state/danger, microphone-3-bold / volume-loud-bold / flag-bold in action/primary; filled components live beside their Linear twins (solar/<name>-bold). Search field: surface fill + line/strong stroke; hover fills sunken and darkens the stroke to ink/tertiary. Evidence is a click target (opens the photo viewer), greyed out when the case has no photo; the viewer zooms around the cursor. Query templates open as a joined continuation of the reply bar (bottom corners square, options separated by line/faint rules, no condition tag). Policy handbook: code + statement only, list starts 24 below the title and clips 24 above the pop-up bottom. Workspace: no sidebar icons; Shelved time reads 3h 14m, On-hold 19m 45s, digits tabular; filter icon opens the five sort options; empty states centred in the list area; the analytics icon is a placeholder for the next phase.
Icon swap (4 Nov, applied)	All 50 frames of the section now use the Solar components: 540 instances, none of the old icon/* set left. Changes you asked for first: your pause glyph (two 6 × 20 bars, 4 apart) replaces mine; question-circle and every other glyph that had lost its dot got it back; the AI star is Solar “stars” (read as your “start (for sparkle)”); every icon was equalised to the 20 / 18 / 20 visual-size rule so no icon looks bigger than its neighbour. The working prototype (artifact “Agent Desk v7.1”) ships the same normalised SVGs.
Icon library (proposal, approved 4 Nov)	New page “Icons · Solar Linear (proposal)”: 34 Solar Linear icons mapped one-to-one to the current set, each shown current → proposed → proposed at 15 px, with the title it sits beside; 11 alternates below. Stroke 1.5 at 24 px (Solar’s native weight; the current set is 1.8–2). Nothing in the screens changes until you approve; then the components swap in place.
Your six follow-up changes	Applied everywhere the element appears, not only in the frame you named: call-bar buttons 4 px apart (element and screen 04); query-templates tag removed (87 tall); no rule between a status row and its chips (both status menus); no closing rule under the last section of a column (Party records, Timeline by party, every screen); transcript speakers Restaurant ink/primary and Agent #3B4CAD; home icon instead of the logo on every screen except My Workspace (new icon/home component in Foundations).
Same-category spacing (your three irregularities)	v7.1 draws every 1-px rule outside the band it closes and uses one number per relation: section title → first text 26 (Order → ID and AI Summary → Customer said are both 26 now); section band 16 / 9 / 16 everywhere (Policy conditions and Timeline are both 16 / 16); title → table caption 26 and caption → rule 8 everywhere (Activity log → STEP and Party records → Customer are both 26). Measured after the rebuild: all eight title → text pairs read 26; all fourteen section bands read 16 / 16.
Timeline by party rows	Your frames used a 32 px pitch here while every other table uses 22. v7.1 uses 22 (same category: table rows). The timeline now ends at y 641 instead of y 731; if you prefer the airier 32 for this one table, say so and it becomes its own category in the rulebook.
Odd band heights	To centre the common 9 px cap on whole pixels, bands are 31 (tabs, buttons, selects, send), 29 (timer, amount input), 27 (chips and options), 39 (reply bar), 37 (list rows, closing strip), 51 (tiles, subject band), 21 (key caps). Your frames mixed 30 / 32 / 40 / 28; every one of those put a 9 px cap half a pixel off centre.
Cancel button	As you asked: while the Confirm / Cancel pair is inactive (08 · reason missing, Report with nothing picked) the Cancel label is ink/tertiary; when the pair is active it is ink/primary. The stroke stays line/strong in both states.
Photo viewer	Agree / Disagree are back as a secondary + secondary pair, 22 below the table row baseline, 20 above the bottom (499 tall), matching your frame’s placement.
Status menus	Customer side keeps Met / Not met. The rider side gets the same component with a third chip, N/A, and the rows R1 / R5 / R4 / R2 / R3 with their iteration-6 statuses (two met, one not met, two n/a). Descriptions truncate to one line so the rows keep the 37 rule.

Topic	What v7 does and why
Party record pop-ups	Fixed at 560 as you asked; the Total rule is pinned at y 506 so the Total row always ends 20 above the bottom, whatever the row count.
Tabs (the item you asked about)	Plain words: a tab is the small rounded label (Customer · Rider · Restaurant, Chat · Transcription, Assigned · On-hold…). Your frames drew them with different paddings (10 or 12 px inside), different gaps (2 to 4 px between tabs) and different heights. v7.1 uses one tab everywhere: 31 tall, 10 px inside left and right, 2 px between tabs, label 13 M, and the label sits on the same baseline as the column title next to it. Nothing else about tabs changed.
Confirm in 09	Enabled (fault, action, reason and amount are all set); disabled only while a reason is missing (08).
Home block	Centred block x 216 → 1224 as before; the three menu dots now have a 3 px gap (your frame and v7 had them touching).
Grey values	#F4F4F4 → surface/sunken #F6F6F6; #8E8E8E → ink/tertiary (as agreed).
Customer and rider record rows	Still placeholders (+12 Late delivery; +9 Late delivery, – Not delivered) matching the summary tiles 1/1 and 1/2. Replace when real data exists.
Reason chips in Report	Kept as 31-tall pills (radius 999, 13 M) because they are multi-select and sit alone in their pop-up; every single-select option (Fault, Put on hold, status menus) is the 27-tall radius-8 chip. If you want one chip everywhere, the 27 rule is the one to keep.
Decision buttons right edge	Four 94 px buttons with a 10 px gap end at x 1422, 2 px short of the 1424 content edge (your frames do the same). Use 95 / 94 / 94 / 95 if you want them flush.
Text trimming and pixel grid	Cap-height trim is set on all 27 Atlas text styles. After the rebuild every text and rectangle in the section sits on whole pixels (0 of 2,009 texts fractional); icon instances scaled from 24 px can still land on half pixels inside their 13–18 px boxes.
Closing strip hint and query templates	Unchanged from v7: no “press Enter or Send” suffix; one iteration-6 template with its condition tag.

6 · Frame index (section “Final · v7”)

Screens occupy rows 1–3 of the section (pitch 1600 × 1100); pop-ups (row 4, pitch 800) and elements (row 5) follow. New in v7.1: “Rider rules · change status”.
